

FRAGRANT CALIFORNIA NATIVE PLANTS FOR THE GARDEN

Gardening for fragrance opens up another dimension of gardening. You can be whisked back to another place and time or other remembrances by the fragrances given off by your plantings. Once you start noticing aromas, you will quickly come up with your own favorites. Since everyone's sense of smell is different, fragrances are open to different interpretations.

THESE PLANTS ARE FRAGRANT WHEN YOU ARE NEAR THEM

<i>Brickellia californica</i> ()	<i>Pinus jeffreyi</i> (Jeffery Pine)
<i>Calocedrus decurrens</i> (incense cedar)	<i>Ribes viburnifolium</i> (evergreen currant)
<i>Oenothera caespitosa</i> (evening primrose)	<i>Salvia clevelandii</i> (Cleveland sage)
<i>Philadelphus lewisii</i> (mock orange)	<i>Solanum</i> species (nightshade)

THESE PLANTS ARE FRAGRANT WHEN YOU ARE VERY CLOSE

<i>Calycanthus occidentalis</i> (spice bush)	<i>Keckiella antirrhinoides</i> (snap dragon)
